**05/1994 – 01/1996** – Pavia, Italy

**Technical Officer**

Section of Plastic and Reconstructive Surgery of the Department of Surgery, University of Pavia

**01/1992 – 05/1994** – Milan, Italy

**Qualified medical assistant**

Ospedale Clinicizzato S. Donato, (Milan) in charge of Plastic Surgery Section II

**01/1990 – 01/1992** – Pavia, Italy

**Graduate Technician**

Section of Plastic Reconstructive Surgery of the Department of Surgery, University of Pavia

**01/1987 – 05/1990** – Como, Italy

**Attending physician**

Division of Plastic Reconstructive Surgery S. Anna Hospital of Como

Directors: Prof G. Lupo, Dr M. Sanna, Dr A. Savani

**01/1985 – 12/1986** – Verona, Italy

**Attending physician**

Division of Plastic Reconstructive Surgery and Burns Centre, Istituti Ospitalieri Borgo Trento of V

Director: Prof. S. Furlan

**11/1984 – 22/05/1989** – Pavia, Italy

**Resident physician**

School of Specialisation in Plastic and Reconstructive Surgery, University of Pavia

Director: Prof G. Boggio Robutti

## INTERNATIONAL FELLOWSHIPS

**05/12/2005 – 15/12/2005**

### **Roosevelt Hospital in New York - Dr Milton Waner**

During this period, Prof. Valdatta performed surgery and clinical discussions on patients with vascular anomalies such as hemangiomas/lymphangiomas and arteriovenous malformations. He was able to improve his knowledge on the use of lasers and on local and systemic pharmacological therapies suitable for these pathologies.

**27/01/2001 – 01/02/2001**

### **Shirners Burns Hospital in Galveston, Texas - Dr Herdon**

During this short but intense period, Dr. Valdatta was able to see the most modern therapeutic methods applied in the treatment of serious paediatric burns, ranging from the strictly surgical side to the rehabilitative and organisational side.

**07/12/1999 – 22/12/1999**

### **Institute of Plastic and Reconstructive Surgery Ninth People Hospital Shanghai-China. Prof. Dong and Wang**

During this Fellowship, Dr. Valdatta deepened his experience in the surgical treatment of scar reliefs resulting from severe burns, through traditional or microsurgical techniques. The catchment area drained by the hospital in question regarding the cases mentioned was such as to allow the development of a profitable clinical experience difficult to find in European countries.

**01/08/1998 – 17/08/1998**

### **Division of Plastic and Reconstructive Surgery, Kawasaki Medical School, Okayama-Japan - Prof. Isao Koshima and Takahiko Moriguchi**

During this Fellowship, Dr. Valdatta deepened, also through anatomical dissection studies, the issues concerning the transfer of microsurgical reconstructive units based on perforating vessels and the potential clinical applications in post-oncological and post-traumatic reconstructions.

**01/01/1993 – 01/01/1996**

### **Division of Plastic Reconstructive Surgery and Burns Centre of the University of Ljubljana (Slovenia) - Prof Z.M Arnez**

During this "Fellowship" period, Dr. Valdatta improved his experience in the field of Hand Surgery, Plastic Reconstructive Microsurgery, Reconstructive Surgery after trauma and/or after tumor ablation, especially if requiring the use of single and/or associated microsurgical units. During this period, Dr. Valdatta worked as an assistant surgeon and operating surgeon, as shown by the enclosed operating register, while carrying out clinical and experimental research activities, as demonstrated by the publications published in print during this period.

**08/1992**

### **Division of Plastic and Reconstructive Surgery of the University of "S. Josè Rio Preto" (S. Paulo, Brazil) - Prof R.R. Bozzola**

During this period, Dr. Valdatta took part in the theoretical and practical activities of the School, studying in particular the techniques of reduction mammoplasty with minimal scarring.

**07/1992**

● **Plastic and Reconstructive Surgery Service of the University of Bordeaux (France) Prof. J Baudet and D. Martin**

During this period Dr. Valdatta perfected his training in Plastic Reconstructive Microsurgery, participating in clinical activity based on the use of microsurgical reconstructive units.

**07/1990 – 09/1990**

● **Division of Plastic and Reconstructive Surgery of the University of "S. Josè Rio Preto" (S. Paulo, Brazil) Prof R.R. Bozzola**

During this period, Dr. Valdatta perfected his theoretical and practical training in procedures based on modern fasciocutaneous and myocutaneous reconstructive units, taking an active part in surgery as an assistant surgeon.

**09/1986**

● **Division of Plastic and Reconstructive Surgery, University of Helsinki (SF) Professor Sirpa-Asko-Seljavaara**

During this stay, Dr. Valdatta was able to attend several reconstructive surgeries, based on the use of skin, fasciocutaneous and myocutaneous flaps, as well as on the use of free flaps according to microsurgical techniques. In these operations, Dr. Valdatta worked as an assistant surgeon.

## MANAGEMENT AND LEADERSHIP SKILLS

### Teaching activity

Dr. Valdatta carried out this activity within the Department of Plastic and Reconstructive Surgery of the University of Pavia from 1990 to 1993. In this period Dr. Valdatta actively cooperated with Prof. Giorgio Boggio Robutti, Professor, in lectures for students of the Degree Course in Medicine and Surgery and for physicians enrolled in the School of Specialization in Plastic and Reconstructive Surgery of the University of Pavia.

Dr. Valdatta, from 1993 to 1995, during his "Fellowship" c/o the Department of Plastic Surgery of the University of Ljubljana-Slovenija, has actively collaborated with Prof. Z.M. Arnez to the accomplishment of the didactic activity pertinent to the Degree Course, in the form of theoretical lectures and practical assistance in the Laboratory of Experimental Microsurgery.

Since 1996, Dr. Valdatta has been teaching, in collaboration with Prof. Angela Faga, Professor, at the Degree Course in Medicine and Surgery and the School of Specialization in Plastic and Reconstructive Surgery of the II Faculty of Medicine of the University of Pavia, which became, in July 1998, Faculty of Medicine of the University of Insubria of Varese and Como.

Since November 2000, Dr. Valdatta has become Head of the Teaching Course in Plastic Surgery at the Faculty of Medicine of the University of Insubria. He is also Professor of "Plastic Surgery" at the Schools of Specialisation in Plastic Surgery, General Surgery, Urology, Gynaecology, Odontostomatology, Gastroenterology, belonging to the Medical Faculty of the University of Insubria.

Prof. Valdatta is currently Director of the School of Specialisation in Plastic, Reconstructive and Aesthetic Surgery at the University of Insubria, which has been activated and recognised as autonomous in the light of the current Ministerial Accreditation Regulations.

### Scientific activity

Research into the level of cAMP in tissue reactions induced by solid dimethylpolysiloxane (silicone) implants in experimental animals.

Research into the biochemical mechanisms involved in the wound healing process. Clinical and epidemiological investigations into skin cancer lesions. Investigations into melanomas focusing on the correlation between lesion thickness and relative prognosis.

The proposal of a variant surgical technique in aesthetic otoplasty operations; the surgical evaluation of a multidisciplinary pathology such as gynaecomastia.

Possible surgical solutions for malignant skin tumours of the internal cavity; vulvar reconstruction techniques consecutive to enlarged vulvectomies for malignant neoplasms.

Poland syndrome in the correction of relative thoracic deformity.

Dermatofibrosarcoma Protuberans addressed with a critical review of clinical case histories; the use of prostheses in Aesthetic Breast Surgery.

Applications of freeze-dried heterologous collagen (L.E.C.) in Plastic Surgery.

Skin lesions caused by Essential Mixed Cryoglobulinemia (EMC).

Experimental study aimed at investigating the possibility of pharmacologically modulating the periprosthetic capsular reaction.

Study on the use of 3D Axial Computed Tomography (T.A.C. 3D.) in pathologies within the competence of the Plastic Surgeon.

Studies on cadavers aimed at investigating specific anatomical parameters underlying the use of certain vascular axes as recipient vessels for the fabrication of microanastomoses. Instrumental study of gait (Gait Analysis) in patients treated with fasciocutaneous and myocutaneous units.

Use of microsurgery in burns, in reconstruction of the cephalic extremity after tumour ablation (oral cavity, mandible), in reconstructions of the lower limb following trauma and/or superimposed infections.

Development of an integrated protocol for the study of Superoxide-Dismutase (S.O.D.) activity in diabetic patients undergoing plastic microsurgery.

Haemodynamics of venous flaps, with particular regard to the role played by the presence or absence of valves in the context of the venous axes themselves.

Experimental studies on rats aimed at investigating the dynamics reactive to silicone implants and the effect of deproteinated bone on bone regeneration.

Retrospective clinical studies, on the effect of certain therapeutic protocols in the context of breast carcinoma together with analyses, aimed at identifying the systemic fragility of certain types of patients undergoing reconstructive surgery treatments, have shown a constant interest in the different clinical-scientific articulations of Reconstructive Surgery.

In 2015, he was a member of the Tender Committee of the ARCA Regional Centre for the selection of breast prosthetic devices, an appointment renewed in 2019 by mandate of the Lombardy Region.
